Abstract (en)

A tap for dispensing drinks at a temperature controlled by a regulating device (2) integrated in the tap (1), between an ambient temperature whereat the drink is found within at least a container thereof (3) and a lower temperature whereat the cooled drink is brought in an installation (5) for distributing the drink along at least a dispensing column (6) or installation (66), where the tap (1) is applied. Said regulating device (2) integrated in the tap (1) allowing the construction of corresponding drink distribution installations with particular characteristics of precision and consistency of the temperature of the drink in every condition of use. <IMAGE>
