Abstract (en)

[origin: US2004216226A1] A system for creating waves at the surface of a liquid contained in a pool, this system comprising: several injectors linked to a source of fluid under pressure, a device controlling the speed and/or pressure control of the fluid ejected from the injectors and/or the direction of the injectors. and in which the control device ideally contains a means of detecting one or more states of at least a part of the surface of the liquid and a means of adapting the speed and/or pressure of the fluid output from the or injectors, and/or the direction of the injectors in relation to the surface state of the liquid.
