Abstract (en)
A fan is disclosed for use in a system, and the system has at least one connection structure (120). The fan is mainly composed of an impeller (102) and a base (110), and the impeller (102) is connected to the base (110). The impeller (102) at least has a hub (104), a plurality of blades (106) and a driver (108). The base has at least one engaging member (114), and the engaging member (114) is corresponding to the connection structure (120). Further, the fan is fixed on the system by connecting the engaging member (114) and the connection structure (120) together. <IMAGE>
