Abstract (en)
A heating unit (2) heats up a room's air via a heating medium. A cooling unit (3) cools down the room's air via a cooling medium. A climate module (1) has linkage connections for supplying and removing the heating/cooling medium. A ventilating unit (5) airs and/or vents the room and recovers heat from the room's air. An independent claim is also included for a building with a climate module for air-conditioning individual rooms.

Abstract (de)
Die Erfindung betrifft ein dezentrales Klimamodul, durch welches unabhängig von zentralen Luftaufbereitungskomponenten die Raumluft in einzelnen Räumen eines Gebäudes erwärmt, abgekühlt oder gelüftet werden kann. <IMAGE>
