Abstract (en)
[origin: WO03092905A1] The aim of the invention is to simplify the construction of a dosage dispenser (1) for dosing at least one component that is contained in a receptacle section (10), by means of a pump unit (6) connected to said section and a pump plunger (6'), which is inserted in said unit and can be actuated by means of an actuating element (3) using a handle (7), in particular about a horizontal pivoting axis (4) in a housing head (8) and which is connected to a delivery nozzle (9). To achieve this aim, the upper region of the pump unit (6) has an annular channel (21) facing towards the delivery nozzle (9).
