Abstract (en)
[origin: US2006037974A1] According to the invention, a dosing dispenser of simple construction, for the dosing of components held in a reservoir section (10) by means of at least one pump unit (6) connected thereto and an adjuster element (3), which may be pivoted about a horizontal axis (4) by means of a handle for operation of a pump piston (6 ') of the pump unit (6) and about a vertical axis for adjustment of the amount ratios of the components may be produced, whereby the pump piston (6 ') comprises at least one guide (12, 12 ') for a non-tipping and/or non-rotating mounting in the upper region thereof. A particularly stable operation of the pump piston (6 ') may thus be guaranteed.
