Abstract (en)

[origin: WO03089244A2] The invention relates to a device for printing essentially non-absorbent printing material embodied as metal sheets. Said device comprises a printing machine pertaining to a printing line and comprising at least one printing group provided with printing ink. The invention is characterised by a first printing device (17) which forms part of the printing line, is mounted upstream of the printing group (24) in the printing direction (4) and is provided with a primer or a white lacquer. The invention also relates to a corresponding method.
