Abstract (en)

[origin: DE10220908C1] An insertion station for a post processing system has a supply system supplying filler material comprising a separating apparatus (7) for separating envelopes from a stack and an envelope supply apparatus (16) running parallel to the conveyor belt of the filler supply apparatus (Z) and which transfers the separated envelopes via an angled and sloping intermediate envelope supply apparatus (35) to strike against alignment devices (30, 32) against which the envelopes are positioned precisely in front of an insertion apparatus (35) which inserts e.g. letters into the envelopes
