Abstract (en)
[origin: WO03095255A1] The invention relates to a vehicle rear parcel shelf (1) consisting of a central panel (6) and two lateral panels (7) which can both move in relation to the central panel (6). The inventive rear shelf (1) comprises means (8) which are designed to control and guide the sliding of each of the lateral panels (7) in relation to the central panel (6) in both directions along the transverse direction (19) of the vehicle between a deployed position and a retracted position in which each lateral panel (7) is essentially retracted below the central panel (6).
