Abstract (en)  
[origin: WO03097483A2] The invention relates to a dispenser (Sp) for distributing individual portions of tablets (3), comprising a cylindrical housing (1), a stroke-limited, displaceable slider (2) and a tablet storage chamber (V) with a connecting dispensing shaft (7) corresponding to the thickness of the tablet (7), wherein closing surfaces and profiled flanks are proportionally configured on the front face and fixed to the housing and are proportionally formed on the slider (2). In order to configure the dispenser for effective pre-ordering of the tablets enabling advantageous use thereof, the dispensing shaft (7) is formed by a spacing (y) of the cylindrical-concentric domed wall (25) of the slider (2) and the inner wall surface (20') of the cylindrical housing wall (20).
