Abstract (en)  
[origin: WO03098109A1] The invention concerns a torch comprising: means for heating air or gas and means (4) for blowing said heated air or gas, and a tubular body equipped with means for supplying fuel gas, forming a pipe for blowing said heated air or gas and comprising a flame catching structure. The device (1) comprises a tubular body (7) equipped with means (8) for supplying fuel gas, one end of said tubular body (7) comprising a flame catching structure (10) and the other end of said body (7) forming a zone (9) for connection with the tube (6) blowing hot air or gas from a known apparatus (2) called paint burner, said apparatus (2) including air or gas heating means (5) and means (4) for blowing said heated air or gas.
