Abstract (en)

[origin: WO03098645A1] Disclosed is a device (2) comprising a superconducting magnet (3) that is provided with at least one cooling agent-free superconducting coil (4a, 4b), and a cooling unit that is provided with at least one cold head (6). A conduit system (10) thermally couples the coil (4a, 4b) to the cold head (6), said conduit system (10) comprising at least one duct (10a, 10b) in which a cooling agent (k1, k2) circulates according to a thermosyphon effect.
