Abstract (en)
[origin: EP1505026A1] The device has a conveyor (2) provided with a transport component (5) for moving an overlapped flow of products in a horizontal direction. A support (6) is located in the conveyor. The support has two alignment units (8, 9) for aligning sides of the flow. The units are arranged at left and right sides of the conveyor, respectively. A unit is disposed adjacent the component for loosening up the flow from below.
