Abstract (en)

[origin: EP1505247A1] The device has a front vertical wall (5A) adjusted to an extent of a case of a roller-blind. An upper extension (4A) and lateral walls (11A) are provided to cooperate with an upper wall (4) and a lateral flask (11) of the case, through a connection unit. The upper extension and the lateral walls are connected to a front wall of the case. An independent claim is also included for a roller-blind including an extension device.
