Abstract (en)

[origin: WO03094972A2] The present invention relates to prodrugs which are capable of being converted into prodrug intermediates of a cytotoxic or cytostatic drug, by the catalytic action of FAPalpha, said prodrugs exhibit- an oligomeric part comprising up to (9) amino carboxylic acid residues, the amide bond between the C-terminal amino carboxylic acid and the preceding amino acid thereof is recognized and cleaved by FAPalpha in the immediate environment of a target cell, and- a cytotoxic or cytostatic part, wherein the N-terminal amino function of the oligomeric part is attached to a capping group (Cg).
