Abstract (en)

[origin: WO03095601A1] The present invention relates to a quaternised amine ester derivative which is useful as anti-gelling or viscosity-control ingredient in softening articles, especially fabric softener. Said quaternised amine ester derivative is a compound derived from a 3-(dialkylamino)-1,2-propanediol and a non-linear fatty acid, such as the isostearic acid.
