Abstract (en)

This invention relates to a method for weaving curved warp yarns and a woven fabric. The method is characterized in that weaving warp yarns are delivered in an inclined direction by using a reed with vertical and inclined dents, the spacing between which is variable. Inclined warp yarns and weft yarns are not interwoven in a vertical direction to form a curved warp yarn pattern in the fabric. The fabric woven by the method according to the invention has an irregular and variable pattern and good appearance. <IMAGE>
