Abstract (en)
[origin: WO03099318A2] The present invention discloses polynucleotides which identify and encode DP119, DP444, DP810, DP685, WE474, DP160, RA977, or RA770 as well as novel functions for these proteins of the inventions. The invention provides for compositions for disorders associated with the expression of the proteins of the invention, such as for the treatment, alleviation and/or prevention of pancreatic dysfunction (for example diabetes, hyperglycemia, and impaired glucose tolerance), and related disorders, and other diseases and disorders.
