Abstract (en)
[origin: WO03097299A1] The invention relates to a system comprising a tool retainer that is provided with a driving device (12) via which an operating tool (14) is connected to a drive shaft (16) so as to cooperate therewith, and an operating tool (14) which is connected to the driving device (12) via at least one catching element (20) that is movably mounted on a spring element (18) so as to cooperate therewith. Said catching element (20) engages with the operating tool (14) and fixes said tool in a form-fitting manner in an operating position thereof. The tool retainer and the operating tool (14) are provided with at least two matching, corresponding form elements (22, 24) in order to simplify mounting of the operating tool (14).
