Abstract (en)

A pack (1), holding a series of applicators e.g. in the form of discs 0.5 - 3 mm thick that can be impregnated with a cosmetic product in liquid or powder form, consists of a container (21) with a lid (23) and an inner moulded plastic support (10). The pack (1), holding a series of applicators e.g. in the form of discs 0.5 - 3 mm thick that can be impregnated with a cosmetic product in liquid or powder form, consists of a container (21) with a lid (23) and an inner moulded plastic support (10). The support has a series of spacers (12) that are hinged at one side so they can open to expose the applicators one at a time, and its base (11) is designed to be retained in the container, e.g. by flexible lugs. One or more of the applicators can have its two surfaces impregnated with different substances, or the applicators can all be impregnated with a product filling the container.

Abstract (fr)

La présente invention concerne un dispositif (1) de conditionnement, comportant : une pluralité d'applicateurs (30), un support (10) pour recevoir les applicateurs, ce support comportant une pluralité d'intercalaires (12) disposés entre les applicateurs, deux intercalaires consécutifs étant reliés entre eux à une extrémité de manière articulée, le support étant réalisé d'une seule pièce par moulage de matière plastique. <IMAGE>
