Abstract (en)
[origin: US2005058798A1] The invention relates to a pressure-sensitive tape for closing, sealing, and gluing joints, in particular in housing construction, and in particular joints in corners and edges, that has a backing on the tape top side, an adhesive coating of the backing on the tape bottom side, and a removable protective film on the tape bottom side, whereby the protective film has at least one first slit. At least one first fold section of the tape is folded in the transverse direction along a first fold edge that runs in the longitudinal direction of the tape, whereby the first slit runs at a different location than the first fold edge.
