Abstract (en)
[origin: EP1508767A1] The practice projectile (1) for a practice cartridge, e.g. for a 120 mm tank gun, is of the same caliber as combat ammunition. The cartridge (3) for the propellant, also in the full-size caliber, has an integrated projectile base (4) with a projecting extension (8) to fit within a recess (11) in the projectile. The extension has an open end (9), and contains the combat shell detonator (10). The practice projectile has an inner limit stop (13) within the recess at the end towards the propellant, to prevent the projecting detonator unit entering fully into the base recess.
