Abstract (en)
[origin: WO03101567A1] A composite toy (1800) includes a first component vehicle (1480) and a vehicle accessory (1512). The first component vehicle (1480) includes a chassis with wheels (1487) and an integral cab portion (1483) and a first coupling member (1458) configured for releasable coupling to another component vehicle (1480). The vehicle accessory (1512) is configured for releasable attachment to the first component vehicle (1480) so as to create a new vehicle (1800) having a modified appearance relative to the first component vehicle (1480). In an alternate embodiment, the composite vehicle (1800) further includes a second component vehicle (1580) including a chassis with an integral cab portion (1483) and a second coupling member (1558) configured for releasable coupling to another component vehicle (1480) either longitudinally or laterally.
