Abstract (en)
[origin: WO03092973A1] The invention relates to a mould (2) for the production of moulded parts on a jolting table. The mould (2) consists of a frame (1) bearing a mould insert (4) in which recesses defining the moulded parts are formed. The form insert (4) is surrounded by a free space in a direction leading towards the frame (1), said area being at least partially filled by a damping medium. At least one security element (12) penetrates the free space (41). The security element (12) is mounted with backlash in at least one of the components (1,4).
