Abstract (en)  
[origin: WO03101810A1] The invention relates to a lightweight construction element having an inner, light metal, framework structure and consisting of a plurality of extruded hollow profiles (1, 2, 3) which are interconnected in a plane configuration. Said lightweight construction element has a circumscribed circle having a diameter of at least 300 mm, and a maximum wall thickness of 0,5 % of said value.
