Abstract (en)
[origin: WO03098116A1] In order to extend the functionalities of a range hood, said range hood is provided with an oxygen sensor measuring the oxygen content in the ambient air. Alternatively or additionally, the range hood (1) can be provided with a climate control device (7) which regulates the air climate and/or room climate around the range hood (1) and by means of which information about the climate below as well as around the range hood can be obtained and used or supplied for further processing.
