Abstract (en)
A luggage comprises a shell (1A,1B) and a shackle lock assembly (K). The shackle lock assembly (K) is mounted in a compartment (H) of the shell and is formed of a shackle (12), a spring housing capable of turning to wind or unwind the shackle (12), a control lever (16) for controlling the turning of the spring housing, a start knob (17) for keeping the shackle (12) in the locking or unlocking state, and a combination lock (11) for controlling the start knob (17) in such a manner that the start knob (17) can not be actuated by an external force at the time when the combination lock (11) is in the locking state, and that the start knob (17) can be actuated by the external force at the time when the combination lock (11) is in the unlocking state.
