Abstract (en)

A plasterboard is made in a jig mould and has a surrounding frame with two pulley wheels at one end of the frame, and two at the other end. The pulley wheels are in parallel planes. Wheels facing each other are identical. The respective wheels are linked by belts and are coupled to a cutting wire. The cutting wire bevels two opposite plasterboard edges.

Abstract (fr)

L'invention a pour objet une nouvelle plaque en un liant hydraulique, à quatre bords amincis, des procédés de fabrication et des dispositifs de fabrication. <IMAGE>
