Abstract (en)
[origin: FR2840853A1] The decorative device (1) consists of a flexible support layer (2) on one surface of which are set and fixed, along predefined zones (5), plant or mineral materials (4) of selected colors producing a predetermined pattern. The materials can be set using a molding template provided with orifices corresponding to the zones. Some raised parts (3) left free on the support layer surround the various colored areas.
