Abstract (en)
[origin: WO03093743A1] The invention relates to an electric refrigerator comprising a cooling space (12) in which a temperature sensor (14) is arranged and which is closable by means of a heat-insulating door (10). Said temperature sensor (14) is connected to a device (18) which regulates the cooling temperature and is adjustable by means of a temperature-setting device (16). The temperature sensor (14) and the regulating device (18) are disposed separately from the temperature-setting device (16) inside or preferably outside the cooling space (12).
