Abstract (en)
[origin: WO03103307A1] The invention relates to a method for sending short messages (SMS) from a public telephone (10, 10', 10'') on a public telephone network to a mobile telephone (MP), characterised in that said short message (SMS) is transmitted by said telephone (10, 10', 10'') to a first server (ITSMS) using a first request according to a first communication protocol, said first server (ITSMS) transmits said message to a second server (MSGAT) using a second request according to a second communication protocol distinct from said first protocol and said second server (MSGAT) transmits said message using a third request according to a third communication protocol to a message server (SMS-C) on the telecommunication network (GSM) to which said mobile phone (MP) is connected.
