Abstract (en)

[origin: EP1512440A1] The device has a support side (26) turned towards a reception zone (14) for a shoe or a foot, such that a free side (27) is opposed to the side (26). A link (51) extends between lateral and median parts and has a front division (52). The front division of the link is placed at a side of the support side. The link has a rear division placed at a side of a free side of a rear support unit.
