Abstract (en)

[origin: EP1512799A1] The tap outlet has a two-part bearing for mounting in and projecting from, a wall. Two vertical pivot pins (7,9) of a pivot part (5) in front of the wall engage turning into two bearing halves (1,2). They have a side connection part (AT) with freely projecting connection arm (11), which has a warm and cold water mixer at the front end away from the wall, near the outlet of the connection arm. Continuous pipes (15,16,KB,17,6,18) for cold and warm water extend in sections through pivot bearing, pivot pins, connection part, and connection arm.
