Abstract (en)

[origin: EP1512801A2] The set has an insert (20) with inner chamber (21). This is congruent in sections with the outer contour (18) of the floor drain (10), so that the drain is fitted with a lower section (15) into the insert. An outer surface (23) of the insert is formed so that the insert can be included in a ceiling during concreting, or fitted into a core bore or similar after concreting. The outer surface has grooves (24) or similar to contain sealing tape or similar. This is for sealing and/or fastening of the insert in the ceiling, and to uncouple the insert acoustically from the ceiling.
