Abstract (en)
A gaming machine 310 includes a plurality of gaming terminal devices having control panels operated by a player, wherein the player plays a game upon payment of a game value. Furthermore, the gaming machine 310 includes: cumulative storage means that stores a plurality of kinds of cumulative values on a per unit game basis at a predetermined rate in response to medals; event value achievement determination means that determines whether or not any of the plurality of kinds of cumulative values stored by the cumulative storage means has achieved an event value pre-set for each of the plurality of kinds of cumulative values; and event activation means that activates an event corresponding to the event value achieved, when the event value achievement determination means determines that the event value pre-set is achieved. <IMAGE>
