Abstract (en)

[origin: EP1513180A1] A housing contains a working fusible conductor connected to contact blades (3). A fusible indicator conductor (24) is directly fixed in one blade holding plate (10) by a clamp connection. The blade holding plate has a projection, and the fusible indicator conductor is clamped between the projection and the remaining section (27) of the blade holding plate. An independent claim is included for a further fuse link.
