Abstract (en)

[origin: US2005211724A1] A device for packaging and dispensing several fluid products is described. The device includes at least two sealed flexible bags arranged in a single rigid container, associated with at least one pump, the rigid container consisting of an open cylinder and the bags are provided each with a pump and a push button, and are mounted opposite on each of the two opposite openings of the cylinder. The device is applicable to appliances containing fluids to be dispensed independently of one another.
