Abstract (en)  
[origin: WO03081689A2] The invention relates to a reforming device for a fuel cell, comprising an evaporating device (6), for evaporating an unprocessed fuel (13) and for the introduction of the unprocessed fuel (13) into a reforming unit, at least one pump for the dosed introduction of unprocessed fuel (13) into the evaporation device (6) and a controller (8). At least one pump is a dosing pump, the speed of which is controlled by the controller (8). At least one monitoring device monitors the dosed amount of unprocessed fuel (13) delivered by the controlled dosing pump.
