Abstract (en)  
[origin: WO2004001359A1] The invention relates to a pressure measuring unit that can be used in the most versatile possible manner, comprising a ceramic pressure sensor (2) that can be enclosed inside a metallic housing (1, 29). According to the invention, the surfaces of the housing (1, 29) that, during measuring, are in contact with a medium, whose pressure is to be measured, are provided with a coating (27) comprised of enamel or of a glass-like material.
