Abstract (en)
[origin: DE10225185A1] Device (10, 10') for provision of route specific information for use in a motor vehicle. The locating device determines the current location of the vehicle; a receiver device which is arranged to receive a multiplicity of information including location specific information; a processor for determining the information that meets predetermined location criteria and an output device for output of the information. An Independent claim is made for a method for provision of route specific information. The invention also relates to a motor vehicle equipped with an inventive device and a traffic information system.
