Abstract (en)

[origin: EP1514492A1] The device has a reloadable unit (3) with a product delivered from a container (2) equipped with a distribution unit (4). The unit (3) has an application unit (13) having a product application surface, and a filling valve (20) connected to a body (9). The valve changes from a closing configuration to a filling configuration by a force that is exerted by the unit (4) and is lesser than that delivering the product from the container.
