Abstract (en)
[origin: EP1515466A2] When a vehicle is moving from country A to country B, a navigation system (11) predicts that the vehicle is entering country B based on a route and a current position. Until it is predicted that the vehicle is moving to country B, a controller (7) controls a channel tuning circuit (6) to receive traffic information concerning country A from a corresponding broadcasting station. If the navigation system (11) predicts that the vehicle is moving to country B when it has reached a point (301) in country A, the controller (7) controls the channel tuning circuit (6) to start receiving traffic information concerning country B from a corresponding broadcasting station.
