Abstract (en)

[origin: US2003235664A1] Film structures, packages and methods of making the same are provided wherein the film structures have a desiccant material incorporated into a sealant layer of the films structures. More specifically, the film structure further includes a barrier material incorporated as an internal film layer within the film structure. The film structure is utilized for a package to hold a product that may be sensitive to the presence of moisture. The product may preferably be diagnostic test strips useful in the medical or pharmaceutical field.
