Abstract (en)
[origin: US2003235667A1] A three or more layered plastic container is provided, wherein the innermost first layer is a plastic layer, the intermediate second layer is a plastic layer adjacent the first layer containing an oxygen scavenging material, and the outermost third layer is a plastic layer. The thickness of the innermost layer is in the range of 0.1 to 3 mils and is controlled based on the desired shelf life of the container in the unfilled condition.
