Abstract (en)  
[origin: CA2488636A1] The invention relates to a method for producing polyurethane foam materials having a density of less than 200 g/l by reacting a) polyisocyanates with b) compounds that comprise at least two hydrogen atoms reactive with isocyanate groups, said polyisocyanates being aromatic diisocyanates or polyisocyanates while the compounds which comprise at least two hydrogen atoms reactive with isocyanate groups contain at least one acrylate polyol.
