Abstract (en)  
[origin: WO2004001133A2] The invention relates to a coating/drying device (10), comprising a first application device (14) for applying liquid or pasty application medium to a first side (12a) of a web (12) moving in running direction (L), particularly of a web consisting of paper or cardboard. Said coating/drying device also comprises a second application device (16) for applying liquid or pasty application medium to a second side (12b) of the web (12) situated opposite the first side (12a), and comprises a drying device (18). According to the invention, the second application device (16) is an application device that operates without coming into contact with the web, and the drying device (18) is located downstream from both application devices (14, 16) in the running direction (L) of the web (12).
