Abstract (en)
[origin: US2005262775A1] A sales and presentation area is described, having individual sales and presentation regions (1, 2), a first part (1) of the sales and presentation regions (1, 2) being arranged in such a way that it at least partially encloses an essentially circular region and a second part (2) of the sales and presentation regions (1, 2) being arranged in such a way that it at least partially covers an essentially circular region, the region at least partially covered by the second part (2) of the sales and presentation regions (1, 2) having a smaller outer circumference than the outer circumference of the region which is at least partially enclosed by the first part (1) of the sales and presentation regions (1, 2), so that an essentially annular region (3) is defined between the first part (1) and the second part (2) of the sales and presentation regions (1, 2). As described, the essentially annular region (3) is rotatably mounted in the horizontal direction.
