Abstract (en)
[origin: WO2004003326A1] Assembly of the frames includes making wooden base frames using metal corner-brackets (16), straps (18) or other traction-resistant elements or through-screws passing obliquely through corners of the frames, resulting in easy assembly and dismounting of the frames for varnishing, maintenance, replacement or other purposes, and also includes a simplified manufacturing process of the wooden components in order to cut linear transversal profile housings (15) for housing metal or PVC elements destined to be coupling components between fixed and mobile frames and guaranteeing necessary seals and heat insulation. The process is suitable, among other things, for manufactured and assembly of large frames.
