Abstract (en)  
[origin: EP1516821A1] An assembly of containers connected to each other, comprising at least three containers (1, 2 and 3) each being designed to contain a different liquid, granular or powder material, and having a capacity that is related to the capacity of the remaining containers in the assembly, thereby making it possible to execute a predetermined number of specific operations or treatments involving the use of a dose of at least some of the materials contained in said containers. <IMAGE>
