Abstract (en)

[origin: EP1516840A1] The reel-spool storage station (1) has a winding reel (3) with a hub (4) wound with a material web, whereby the winding reel is driven by a drive unit. A winding spindle (6) is fastened on one side and in the roll-off region of the winding reel is installed at an angle (alpha) to the longitudinal axis of the winding reel and upon which the material web (5) is wound in spiral form from the winding reel by a winding unit (8). The aforesaid angle lies within the range of preferably 5 to 45[deg].
